

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Grenglins

Your Name Zoish Golwala

Your Team Member's Name Pari Singh

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

I was partner B, so I completed iteration 1B and 2B. My partner and I did iteration 0, 3 and the bonus together. I commented the food class, objPos class, and GameMechs class.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

She did iteration 1A and 2A, and commented the player class, main project, and objPosArrayList class. She worked on iteration 0, 3, and the bonus with me.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

This project went very smoothly as there was really good communication between my partner and I. We were able to work on iteration 1 and 2 on our own time as the tasks were very separate. When it came time to put our work together (iteration3) we met in person which was helpful in having our classes interact with each other effectively. We also commented our code throughout the project which helped each of us understand one another's code easily. It was a learning curve having to merge the current repository with other versions, but we practiced a few times and got the hang of it. It was overall a very good experience, with very few obstacles due to great partner communication.
